

The present quality of news reporting of best videos, best movies, best recordings, etc, has made it nearly impossible to get any real news on the state of the country or the world.

To remove the last few regulations on the ownership of all the reporting media within a given market will make it absolutely impossible. The First Admendment of Free Speech is being deregulated away by a desire to make money at any cost. Please retain the regulations (or even add more)on restrictions on one ownership of multiple news papers, television stations, and radio stations within the same market.

Thank you

Dorothy Freeman
